

Earth Facts

- It's a scientific fact that the earth revolves on its axis.
- It is also a scientific fact that it takes a 24 hour period of time for the earth to complete one revolution.
- It also is a fact that the spring equinox has 12 hours daylight plus 12 hours of darkness to complete one revolution of the earth.

If your answer to the question was

3 days and 3 nights

then YOU ARE CORRECT!

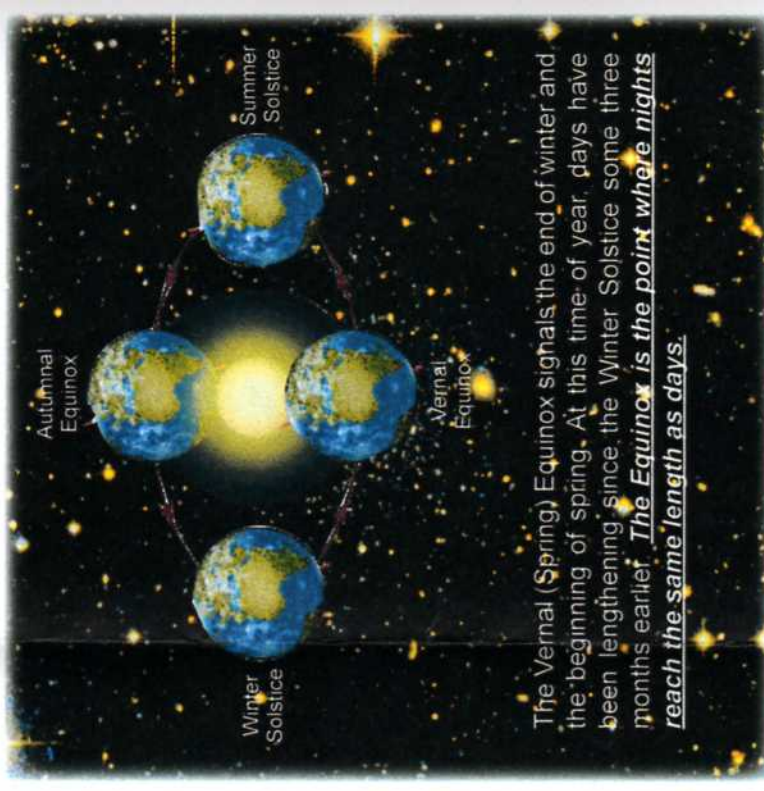

Each year in the spring many people observe Easter and believe that at 3 o'clock on a Friday afternoon a man died and that he arose at sunrise on Sunday morning!

But how could that be?

In Matthew 12:39-40 Jesus said that the only sign that he was the Messiah is this; He would be three days and three nights in the heart of the earth.

It is IMPOSSIBLE to count 3 days and 3 nights from Friday 3 o'clock in the afternoon to Sunday morning sunrise!

In John 11:9 Jesus answered them, "Are there not 12 hours in the day?" This statement was made during the spring equinox at that point in time there are also 12 hours in the night totalling 24 hours.

The Vernal (Spring) Equinox signals the end of winter and the beginning of spring. At this time of year, days have been lengthening since the Winter Solstice some three months earlier. The Equinox is the point where nights reach the same length as days.

3 days and 3 nights equals 72 hours.

Is there a mistake in man's teachings and beliefs?
Is the Bible correct?
Did God make a mistake when he created the earth, sun, moon, and stars - our solar system?

In Genesis 1 verses 5, 8, 13, 19, 23, and 31 God's timetable since creation has always been evening first, then morning - sunset to sunset makes each 24 hour day.

You need to know the TRUTH!

Jesus also said in John 8:32 "You shall know the truth and the truth shall make you free."

What is the sign of the Messiah?
